These Oakland Features Make Possible The Special Guarantee

The new and remarkable features embodied in the Oakland engine-features which have made possible the sweeping Oakland guarantee-are causing considerable comment throughout the automotive industry.

Oakland's special design and construction of cylinders, pistons and piston rings have supplied the much-sought-for means of eliminating an annoying trouble familiar to drivers of motor cars—"oil pumping".

Just how fully Oakland engineers have solved this problem for motorists-particularly in these times of low grade fuels and oils—is best proven by the terms of the Oakland 15,000 mile written guarantee against "oil pumping."

Read this unusual guarantee—when you come in to inspect the five attractive models on exhibition.
